

ENVIRONMENTAL POLICY

As an office-based organisation and a supporter of tenant businesses on site, the direct environmental impacts of BarnsleyBIC operations arise in the main from our use of resources, our choice of products and services and our arrangements for the disposal of waste

Effective environmental management can reduce our impact on the environment, improve operational efficiency, and identify opportunities for cost savings. BarnsleyBIC Ltd has accordingly set out the following policy and principles with the express purpose of supporting sustainable development:

BarnsleyBIC Ltd:

- Aims to apply the principles of “sustainable development” – that is, development which meets the needs of the present, without compromising the ability of future generations to meet their own needs.
- Strives to adopt the highest available environmental standards in all operations.
- Seeks to improve its environmental performance continuously and gives due consideration to minimising negative environmental impacts in all aspects of business operations.
- Fosters the commitment of all management and staff to improving the environmental performance of business.
- Aims to minimise the use of materials, supplies and energy wherever possible using renewable or recyclable materials and disposing of unavoidable waste in a responsible manner,
- Minimises potential pollution and aims to support ‘pollution-free’ processes in all aspects of the business.
- Expects similar environmental standards to be applied by all third parties involved with BarnsleyBIC – suppliers, vendors, contractors and partner organisations and aims to assist our customers to utilise our products and services in an environmentally sensitive way.
- Is committed to promoting corporate environmental responsibility as an essential part of business excellence and aims to encourage businesses to embrace sustainable development as a strategic business performance issue.
